TOURING RALLYE RACING TECHNOLOGY

01-021-0010-0

Installation Instruction Roadbookhalter RB-01

- Waterproof
- Cover can be opened and closed without tools
- Large field of view
- Large knobs allow easy and precise rolling of paper
- Rubber ring belt will drive both roll axes at the same time and makes paper turning easier
- Clamps allow secure attachment on 12mm bar such as handlebar crossbar

Material

- RB01 has a light but strong aluminium housing
- Axles have long lasting plastic bearings
- Screen is made out of strong macrolon

Size

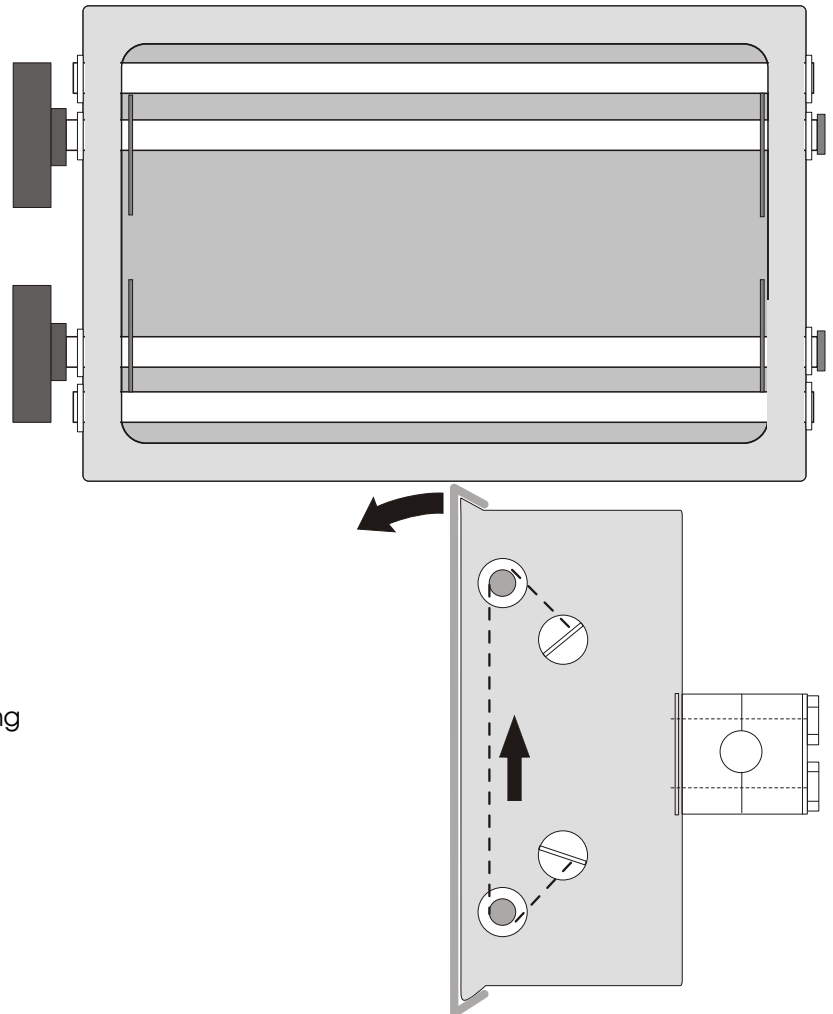

190 x 130 x 65 mm

Installation

- Hold first the Roadbook on the handlebars to find optimal position. Make sure it does not interfere with fairing or other motorcycle parts at full steering lock.
- Mark the position of clamps on the back of the housing.
- Do not position clamp in the middle if roadbook lighting will be installed.
- Drill two 12 mm diameter holes 20 mm apart.
- Attach now the clamps and install the roadbook on the handlebar crossbar or other adapter.

Operation

Pull first the cover off the roadbook holder as shown on the illustration above. Attach then the end of the roadbook paper with tape on the lower rear drive axle. Roll then the complete paper roll on the axle and attach the end of the paper with tape on the upper rear axle. See illustration above. Now the paper can be rolled on the axles back and forth. Set the cover back on the roadbook.

Accessories and spare parts:

Mounting clamp
Macrolon cover
Spare drive belts

Lighting
Holder for IMO 100
